A farmer borrowed a sum at 8% SI for 6 years and earned ₹24,000 as interest. If he wants to earn the same interest in 3 years, what rate of interest per annum should be charged?

A) 14% B) 15% C) 16% D) 18%

A certain sum of money invested at 4% for 9 years yields Rs 1980 as simple interest. At what rate of interest the same amount can be received on the same sum after 6 years?

A) 8.5% B) 7% C) 6.5% D) 6%

A sum of money becomes four times at simple interest rate of 5%. At what rate it becomes seven times

- a) 8% b) 10% c) 12% d) 14% e) None of these

A person lends 40% of his sum of money at 15% per annum, 50% of rest at 10% per annum and the rest at 18% per annum rate of interest. What would be the annual rate of interest, if the interest is calculated on the whole sum?

A) 13.4% B) 14.33% C) 14.44% D) 13.33%

A man divides his capital into three parts. He invests 50% at 16% per annum, 30% at 12% per annum, and the remaining at 10% per annum. Find the effective annual interest rate on the whole capital.

A) 12.5% B) 13% C) 13.6% D) 14%

Manga took a loan at simple interest rate of 6% in the first years with an increase of 0.5% in each subsequent year. He paid interest of Rs. 3,375 after four years. How much loan did she take?

- a) Rs. 12,500
- b) Rs. 33,250
- c) Rs. 15,800
- d) Cannot be determined

A certain sum of money amounts to Rs.800 in 2 years and to Rs. 920 in 3 years then the sum is

A)420 B)680 C)560 D)None of these
